# 99

In the UAE, there is a notable issue with companies neglecting vehicle maintenance, especially during the summer months. According to a survey by Audi Abu Dhabi, around 28% of UAE companies fail to have their trucks checked for the summer season. This neglect is concerning given the high temperatures in the UAE, which can soar to 50 degrees Celsius, significantly impacting vehicle performance and safety.

Thomas Edelmann, Founder and Managing Director of RoadSafetyUAE, highlighted that poor maintenance can lead to mechanical or electrical failures, increasing the risk of vehicle fires. In 2022, the Ministry of Interior reported 1,134 transportation fires in the UAE, of which 71% involved commercial vehicles.

# Why Should You Use a Fleet Management Solution

A Fleet Management Solution is the key to unlocking a spectrum of benefits for your business:

## Optimised Performance

Fleeto is designed to provide real-time insights, allowing for data-driven decisions that enhance operational efficiency and reduce costs.

## Improved Safety & Compliance

Fleeto enables fleets to be compliant with operational standards and road regulations through monitoring, tracking and notifications.

## Enhanced Operational Visibility

Gain a comprehensive view of your fleet's activities with real-time tracking and reporting.

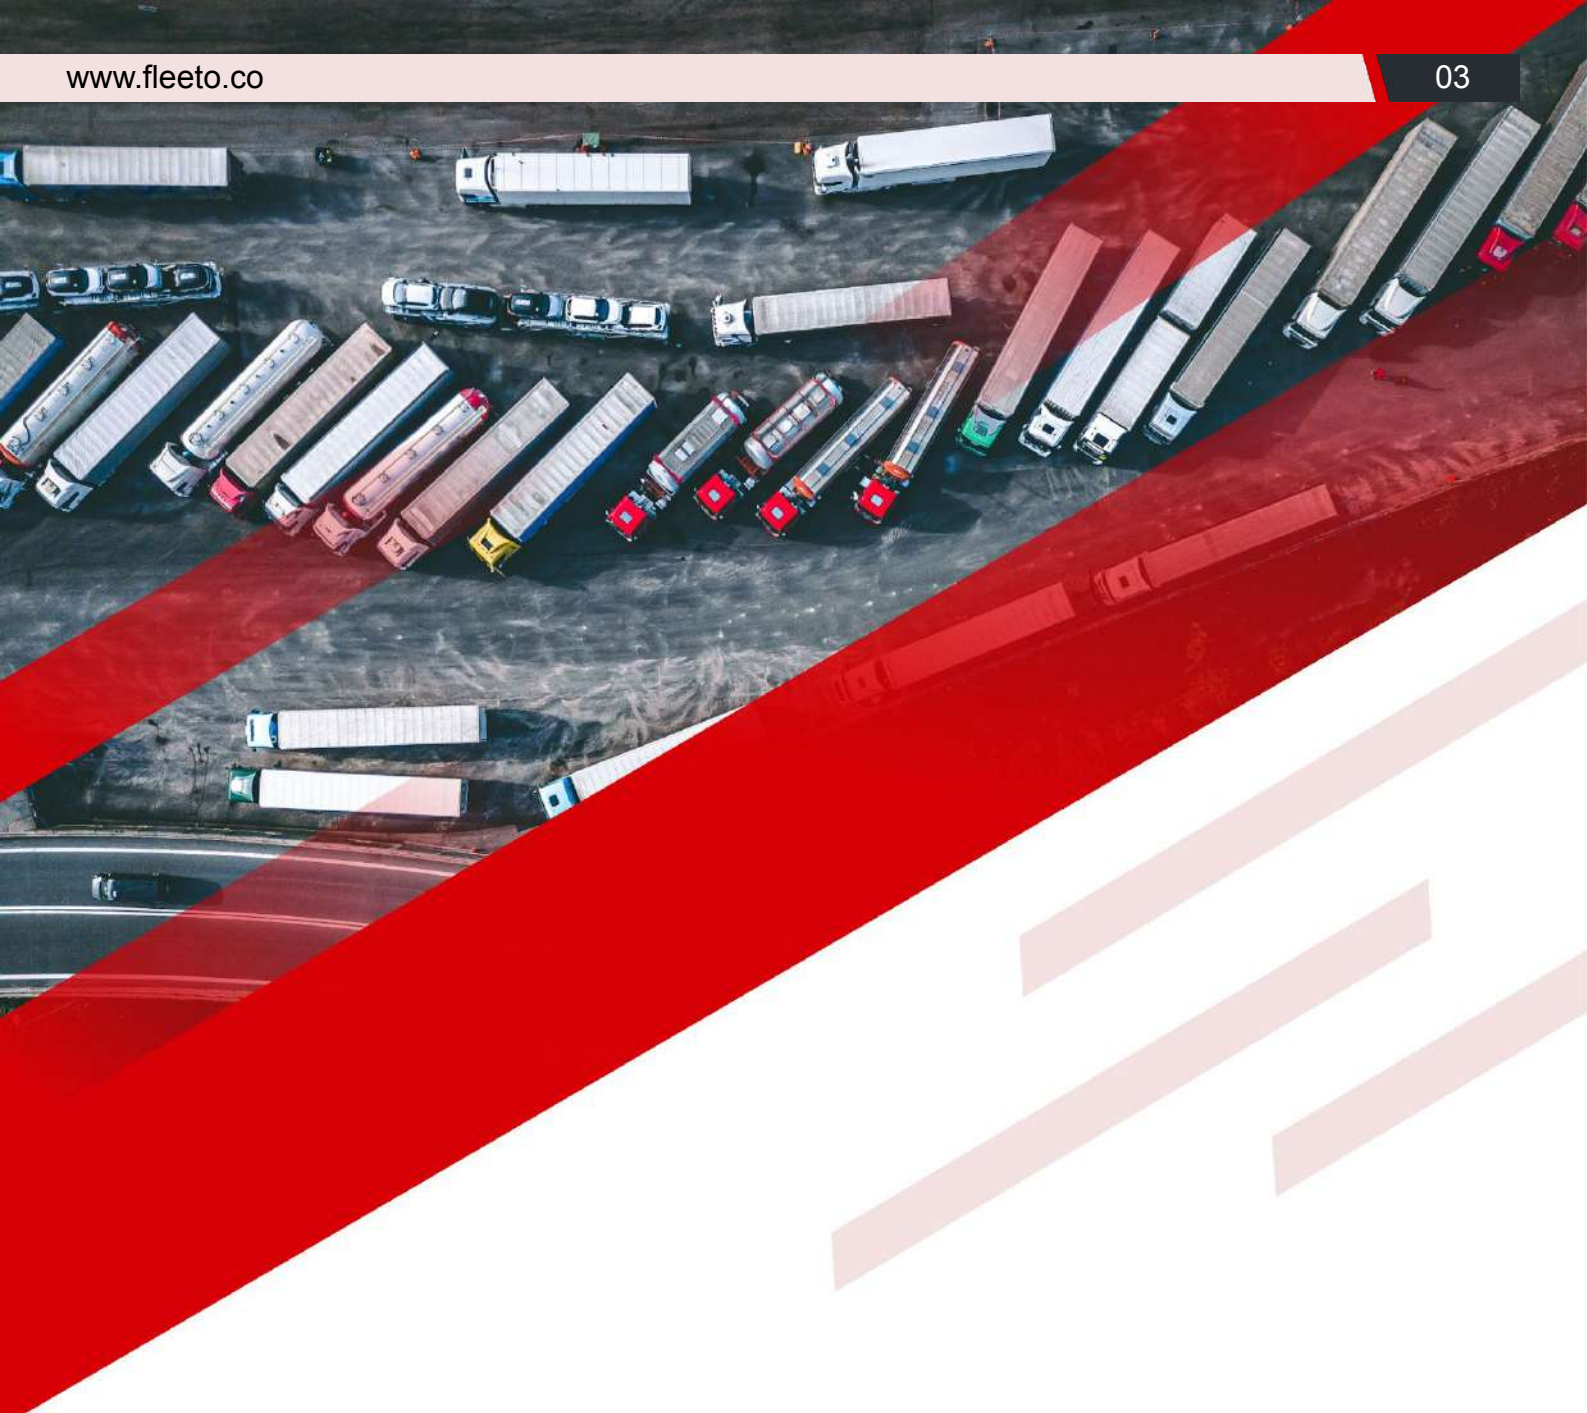

## Improved Vehicle Management

Monitor and analyze Vehicles in the fleet, get vehicle maintenance alerts and other reports.

**Choose Fleeto as your trusted partner , and let's drive success together on this journey.**

## What is Fleeto

Fleeto is an premium and intelligent fleet management solution designed to comprehensively address the needs of companies with vehicle fleets.

Fleeto has partnered with Teltonika to use their premium quality devices that are tried and tested for efficient fleet management.

Adding to Fleeto's strengths is its partnership with TomTom, a leading map, navigation and traffic data provider which is also used by Uber.

Fleeto has been designed specifically for these Teltonika tracking devices that are fully approved by regulatory authorities for use as well as TomTom's mapping solutions.

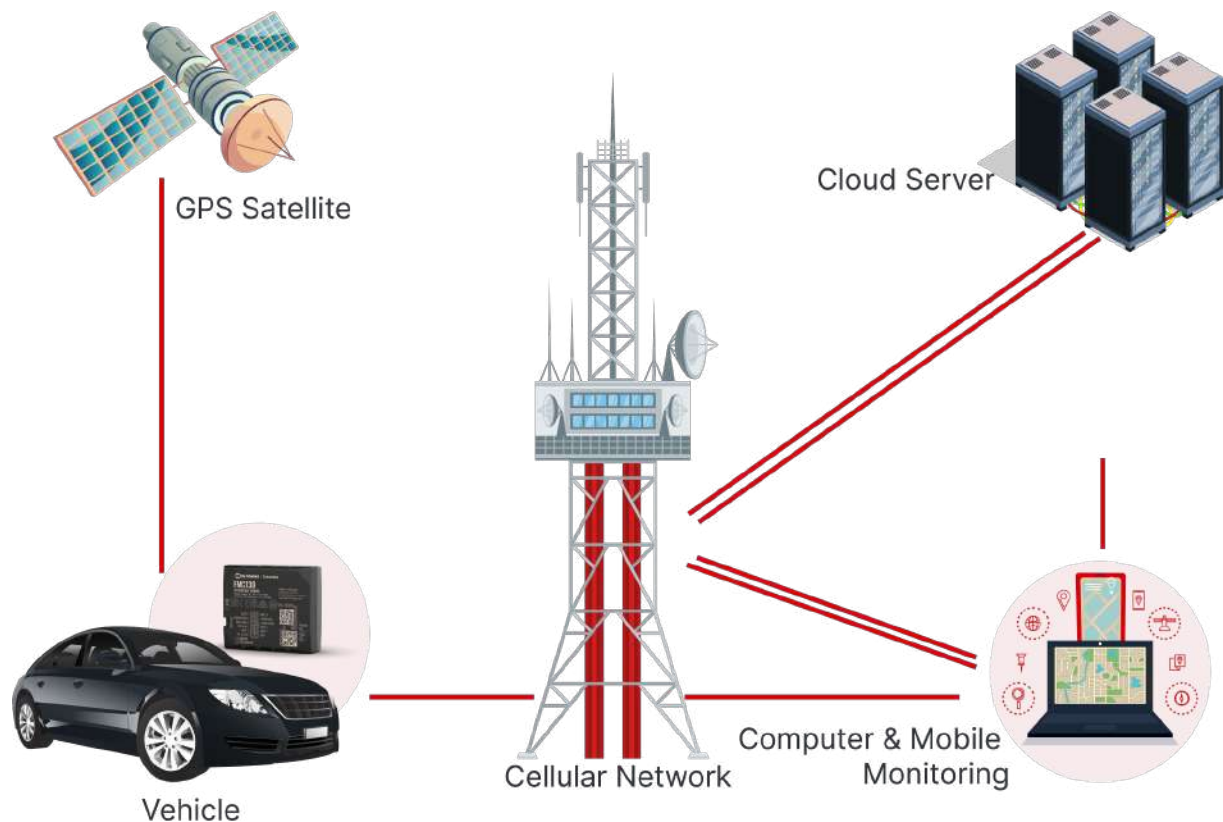

# How Fleeto Works

Fleeto combines GPS and AI for intelligent Fleet Management

Tracker in device keeps track of location, vehicle status, and driving behavior

This data is sent to cloud server and analyzed by Fleeto

User gets performance, safety, and maintenance insights via the Web Portal and Mobile Application.

In the USA, fleet management systems are rapidly growing, with a projected increase from 15.3 million units in 2022 to 27.6 million by 2027. Latin America is experiencing similar growth. Our aim is to achieve comparable growth in the UAE's fleet management market.

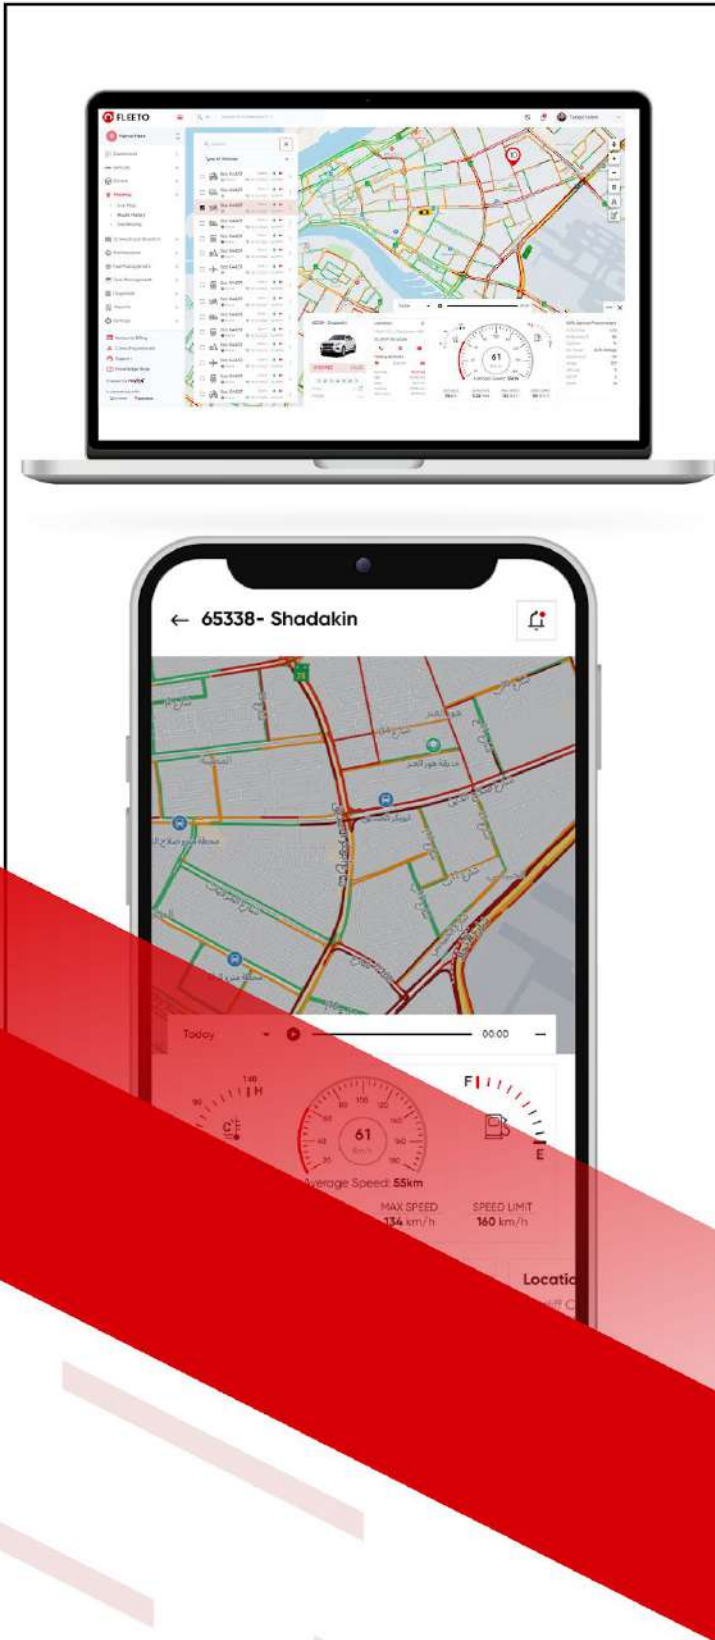

# Our Solutions

Different companies have varying needs; some vehicles require more attention, while others mainly need maintenance. Fleeto provides three tailored packages - Basic, Standard, and Pro - to meet these diverse demands. Choose the best fit for your business, be it a small enterprise or a large corporation, with Fleeto's promise of affordability and advanced features

Basic	Standard	Pro
Live Tracking	Live Tracking	Live Tracking
Historical Tracking	Historical Tracking	Historical Tracking
Geo Fencing	Geo Fencing	Geo Fencing
Document Tracking	Document Tracking	Document Tracking
Notifications & Alerts	Notifications & Alerts	Notifications & Alerts
Playback Route	Playback Route	Playback Route

Leaderboard	Leaderboard	Leaderboard
-	Maintenance	Maintenance
-	Task Management	Task Management
-	Dispatch & Schedule	Dispatch & Schedule
-	-	Vehicle Diagnostics
-	-	Fuel Management

# Fleeto Features

## Live & Historical Tracking

Monitor your fleet in real-time as well as track vehicles' historical trips and drivers, with detailed travel logs and playback videos.

## Driver Management

Fleeto helps you monitor driver behavior, track driving patterns, and ensure adherence to safety guidelines.

## Vehicle Maintenance

Manage vehicles and drivers with bulk uploads and auto license scanning, and view detailed performance metrics.

## Geo Fencing

Geo-fencing enables you to set virtual boundaries for your vehicles. Fleeto alerts you when a vehicle enters or exits predefined geographical areas.

## Task Management

Create, assign, and prioritize tasks to meet business needs, with status monitoring and secure document storage.

## Fuel Management

Monitor fuel consumption patterns, identify inefficiencies, and implement strategies to reduce fuel costs.

## Vehicle Diagnostics

Stay ahead of potential issues with Fleeto's diagnostics feature. It provides insights into the health and performance of your vehicles.

# The Unique Edge of Fleeto

## IntelliDiagnostics

Fleeto IntelliDiagnostics revolutionizes fleet management with AI-driven predictive maintenance, integrating real-time diagnostics.

## Premium Solution

Fleeto is a premium solution that has built specially for the premium devices by being in direct partnership with the device and Map providers.

## Flexible Pricing

Our flexible pricing structure offers three tailored packages to suit your unique fleet management needs. We also offer installment payments.

# The Devices

All devices used within the Fleeto platform are manufactured by Teltonika with highest quality standards. These fleet tracking devices are fully approved by regulatory authorities for use within the region and remains under full warranty during the subscription period.

## FMC920

GPS device with accelerometer to detect speed, accidents, harsh acceleration and braking as well as excessive idling.

## FMC130

GPS device with external CAN support to detect additional data such as fuel, odometer, RPM, engine temperature.

## FMC150

GPS device with internal CAN support to detect additional data such as fuel, odometer, RPM, engine temperature.

## FMC003

OBDII device for OEM diagnostic data with unplug detection, fuel, odometer, RPM, engine temperature.

## FMC640

GPS device with support for multiple sensors, cameras, offline tracking, jamming and towing detection.

## Eye Beacon

Bluetooth low energy beacon for location detection with 10+ years battery life. Eye Beacon can be paired with any device

## Eye Sensor

Bluetooth low energy sensor to track temperature, humidity, movement, and more. Sensor pairable with any device.

## DSM Camera

Driver safety monitoring camera to detect fatigue and distracted driving, including smoking, phone use, seat belt use.

## Dual Cam

Camera to record and monitor in-cab and road view. Up to 40 hours recording stored on device.

# Your Road to Success with Fleeto

Navigate the road to success with confidence, empowered by a suite of cutting-edge features meticulously crafted to elevate every aspect of your fleet operations.

## Fleet Management For All Industries

# About Fleeto

Fleeto isn't your typical fleet management system. It's a smart, forward-thinking solution crafted to boost efficiency, safety, and overall profitability. Through cutting-edge data analytics, Fleeto empowers businesses to make well-informed decisions. It keeps a watchful eye on key metrics like fuel usage, maintenance timetables, and driver conduct, offering a holistic perspective on fleet operations. As a division of Royex Technologies, Fleeto benefits from a decade of industry expertise, and it proudly collaborates with TomTom, a premier mapping solution provider, and Teltonika, a top GPS IoT device manufacturer. Fleeto stands tall in the industry, combining innovation with a wealth of experience.

TomTom leads the mapping industry, powering one in every five vehicles globally and serving as the preferred choice for Uber, AWS, Meta, and Microsoft. Their groundbreaking navigation tech reshaped travel experiences, personalized for users.

They're also the default mapping provider for industry leaders like BMW Motorrad, Sygic, Renault, Huawei, Volkswagen, Mazda, Toyota, Peugeot, and more. TomTom remains at the forefront of innovation, striving to map the world in real-time while democratizing data through collaborations with the big firms.

Teltonika specializes in manufacturing professional connectivity equipment for the international market. They've installed over 20 million GPS IoT devices worldwide, claiming an impressive 65% market share, showcasing their industry dominance and technological excellence. Their comprehensive control over the product development cycle allows them to respond swiftly and effectively to the evolving market demands.

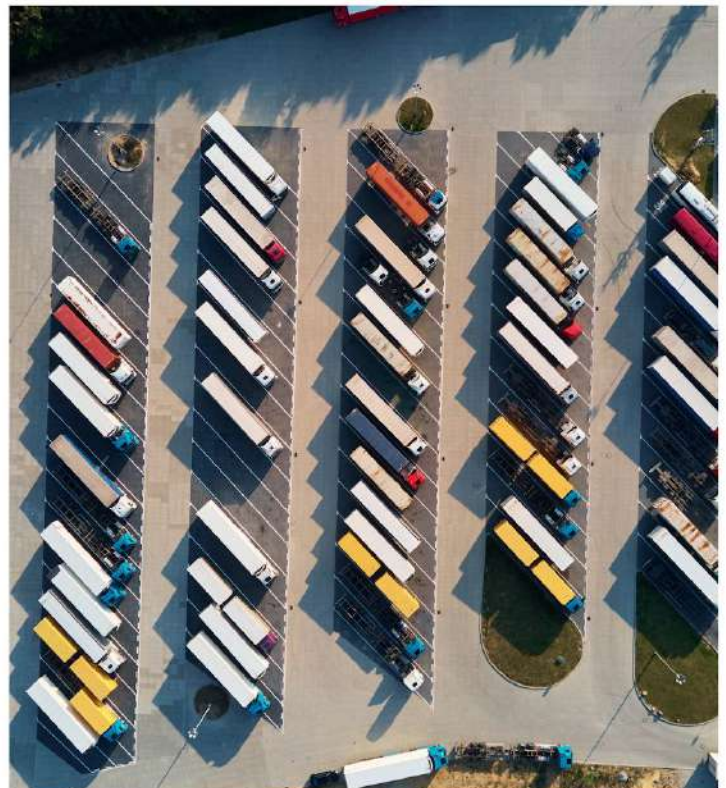

Their focus on reliability, security, and user-friendly industrial devices ensures seamless connectivity in challenging environments.

Fleeto is a division of Royex Technologies, an pioneering development company based in Dubai, UAE, specializing in eCommerce, mobile app solutions, and Metaverse development.

Since its inception in 2013, Royex has fostered a reputation for excellence, collaborating with major entities such as NEOM, FIFA, Coca-Cola, Dubai Duty Free, Dubai Aviation, NBAD, and more. This extensive experience with industry giants underscores Royex's depth of expertise and proficiency in the tech landscape.

The backbone of Royex's success is its talented and diverse team, driving the company's growth and prominence in the technology industry. With a global presence, Royex Technologies remains a beacon of technological innovation in Dubai, leveraging its expertise to deliver cutting-edge solutions.
